

Creative Choice Homework

Spring Term
Sycamore

Your 'Must Do' Science Task

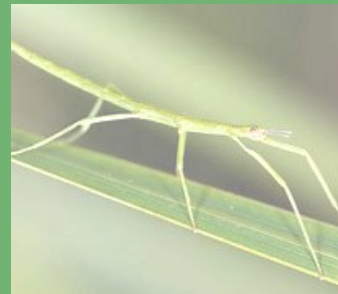

This term we have had some new arrivals in Sycamore class...stick insects and guinea pigs!

As a class, we have discussed the importance of providing them with the best care and conditions that we can to make sure that their stay with us is a happy one!

Your task

Research stick insects and produce information on these key areas:

- Their habitat (How can we create the best habitat for them to live in?)
- What do they eat? (What food do they need to survive, where will we find it?)
- How do we care for them each day? (What jobs will we need to carry out daily/weekly to look after them?)

You can present your work how you like such as in a presentation, a video or a leaflet!

Choice 1—Art

Monotype and Prints

Research and Create

This half term we are looking at 'monotypes' and how they are used within the art of famous artists.

Can you conduct some of your own research of monotypes in art and have a go at creating some of your own work on the theme of 'Spring'.

Choice 2— Wellbeing

Spring is an amazing season to get outside and it is really important to look after ourselves and our wellbeing.

Nature is one of the best ways to keep ourselves healthy both physically and mentally!

Can you get yourself outside doing one of your favourite hobbies or spending time with family and friends?

Take photos or write a diary to document what you got up to!
